

# LAWN CARE

## GUIDE FOR ALL SEASONS

### SPRING

1. Start mowing later in spring when the grass is well-established.
2. Scarify (dethatch) the lawn to help new grass grow easily.
3. Aerate to loosen compacted soil.
4. Overseed to repair any bald lawn patches.
5. Fertilise to give your lawn a boost after the colder months.
6. Water regularly.

### SUMMER

1. Mow regularly, leaving the grass blades longer.
2. Water regularly and use wetting agents to facilitate water penetration during dry spells.
3. Check for and remove weeds manually (if necessary).
4. Apply slow-release fertilisers to strengthen the grass and preserve its green colour (optional).

### AUTUMN

1. Mow the lawn at a shorter length.
2. Reduce watering frequency.
3. Be on the lookout for weeds.
4. Aerate if the lawn seem compacted from foot traffic (optional).
5. Top dress (if necessary) to make the whole lawn even.
6. Overseed before the frost arrives.
7. Fertilise with an iron-rich product to prevent moss buildup.

### WINTER

1. Mow occasionally at a shorter length.
2. Water less often and early in the day.
3. Get rid of weeds when necessary.
4. Avoid walking on your lawn if it's wet to prevent compaction.
